

Home Escape Plan

Fires can occur anywhere and at any time. That's why the Aboriginal Firefighters Association of Canada strongly advises every family has an escape plan and working smoke alarms and a CO detector in case fire breaks out in the home.

Video Clip 1:

*Super: Arnold Lazare,
Aboriginal Firefighters
Association of Canada
(runs approx 1:15sec)*

A home escape plan is something that we suggest each family have. It consists of getting the family together,

*Cover shot of infographic
map of the home*

drawing a map of their house and making sure that they have two ways out in case of a fire.

*CLIP AT 1:00
COVER WITH SHOT OF TREE
AND THEN, WIDE SHOT OF
THE PLAN*

and then, we also suggest that they practice it as well – usually in Fire Prevention month.

*Super: October is
Fire Prevention month*

Clip (01:48)

Working smoke alarms and a working Carbon monoxide detector are two of the main ways that we protect our families.

*Super: Consider buying a
10 year sealed lithium battery
powered smoke alarm.*

*Shot of smoke alarm
being tested*

Arnold Lazare: (01:59)

Check your smoke alarm once a month and change the batteries at least once a year.
